# Distribution Incentives Management System (DIMS)

Presented by:  
Al Rouse, Resource Consultants, Inc.

Resource Consultants, Inc.

# Distribution Incentives Management System (DIMS)

- Currently being used to manage Assignment Incentive Pay (AIP)
- Tracks and manages the allocation of monetary and non-monetary distribution incentives
- Provides financial management support, including planning, monitoring expenditure levels and building/defending budget

Resource Consultants, Inc.

# DIMS Modules

- Tracking Module gathers and stores activity manning and JASS vacancy and application data needed to establish locations and levels and assess cost-effectiveness.
- Forecasting Module tracks actual expenditures and obligations and assists in forecasting future expenditures to build and manage the budget

# Powerful Data Storage and Abstraction

- Provides independent data from various Navy systems regularly collected and logically warehoused in OLAP data cubes.
- Establishes a “virtual point of access” where the Navy can analyze data from multiple, often disassociated systems as it would from a single data source.
- Data Warehousing allows for historical trend analysis, striking measures of effectiveness, and a solid basis for the prediction of the effects of future decisions.

# Logical Analysis Reporting

- Custom built reporting tools provide the user with flexible and relevant data analysis – without the frustration of having to manually sift through vast amounts of data.
- The underlying OLAP data structure allows the user to quickly and easily pinpoint the desired level of reporting detail, from the entire Navy to a specific billet, across an entire year or a single requisition cycle.

Resource Consultants, Inc.

# Distribution Incentives Management System (DIMS) DEMO

**Lowest Manning Ratios**

(The percent of billets authorized that are filled during March, 2003)

Area	COB / BA
<a href="#">SAMERICA</a>	74.07%
<a href="#">CANADA</a>	77.42%
<a href="#">AFRICA</a>	80.00%
<a href="#">OTH-ASIA</a>	82.29%
<a href="#">JAPAN</a>	84.65%
<a href="#">FALLON</a>	84.71%
<a href="#">MERIDIAN</a>	85.36%
<a href="#">AUSTRALIA</a>	85.45%
<a href="#">OKINAWA</a>	86.85%
<a href="#">OTH-EUROPE</a>	88.10%

**Lowest Application Ratios**

(The percent of vacancies applied for during March, 2003)

Area	Apps / Vacs
<a href="#">OTHER</a>	0.00%
<a href="#">CANADA</a>	0.00%
<a href="#">BAHAMAS</a>	0.00%
<a href="#">AUSTRALIA</a>	0.00%
<a href="#">AFRICA</a>	0.00%
<a href="#">NEW LONDON</a>	1.95%
<a href="#">HAVELOCK</a>	4.99%
<a href="#">FALLON</a>	5.13%
<a href="#">SASEBO</a>	5.16%
<a href="#">DALLAS</a>	5.97%

**Avg Consecutive Unfilled Cycles**

(Average number of cycles for which billets have gone unfilled as of March, 2003)

Area	Avg Cycles
<a href="#">KEY WEST</a>	1.3
<a href="#">SOUDA BAY</a>	1.3
<a href="#">OKINAWA</a>	.9
<a href="#">SASEBO</a>	.9

**Highest Proposed AIP Cap**

(ATC's currently with the highest DIMS proposed AIP cap)

ATC	AIP Cap
<a href="#">INA:ITALY, NAPLES</a>	\$500.00
<a href="#">SIC:SICILY, SIGONELLA</a>	\$500.00
<a href="#">JHM:JAPAN, HONSHU</a>	\$250.00
<a href="#">MISAWA AFB</a>	

**1-April-2003**Recent Manning Data:  
Recent Jass Data:March - 2003  
March - 2003, Cycle 1

The Distribution Incentives Management System (DIMS) is intended to serve as a decision support system to assist in the management of Navy distribution incentives. A primary function of DIMS will be to record, administer and propose Assignment Incentive Pay levels.

There are currently no alerts set.

The DIMS website is a decision support tool that allows the user to generate and view manning and other statistics and input or change AIP cap amounts for the AIP areas. The website consists of the following tools.

- 1. Home Page** - The Home Page is the first page the user sees once they log in to the website. The Home Page is basically a bird's eye-view of the current state of various metrics and statistics that are valuable in deciding upon and measuring the effectiveness of changes to AIP caps. The page displays the last month and cycle of the most recent data as well as the following metrics:
  - The ten areas with the lowest applications to vacancies ratio during the last month for which there is data.
  - The ten areas with the lowest COB to BA ratio.
  - The ten areas with the highest average consecutive unfilled cycles.
  - The ten ATCs with the highest proposed AIP cap rates.The page allows users to follow links to a more detailed graphical report for a particular Area or view a report for an alert that he/she had set previously.
- 2. AIP Page** - The AIP page provides links to the following tools:
  - 1. AIP Review Page** - The AIP Review Page allows the user to generate a report of DIMS proposed AIP caps. The user can filter the contents of the report by selecting specific areas, ATCs, PGs, etc. that are of interest. Once a report has been generated, the following options are available to the user:
    - View manning, application, and unfilled cycle metrics.
    - View current AIP caps and DIMS proposed AIP caps an increase in cap is displayed in red, a decrease in green.
    - Input his/her user proposed AIP cap.
    - Set his/her user proposed AIP cap to the DIMS proposed cap value.
    - Review the proposed caps and comments of other users.
    - Input his/her comments regarding a user proposed AIP cap or comment.When the user first accesses this page, he/she can use the selection criteria at the top of the page to restrict the view to only those
